“Matthew’s expert advice and the grant transformed our business, boosting productivity and efficiency effortlessly “

“The Go Digital project empowered us to embrace digital transformation and future-proof our small business. “

“Thanks to the grant, our new laptop changed how we manage and grow daily operations.”

“Our experience with Norfolk’s Go Digital project has been transformative for our business. From the start, the support and guidance provided by our advisor, Matthew, were invaluable. He took the time to thoroughly understand our business needs and offered tailored advice on how to enhance our digital capabilities.

One of the highlights of the programme was the £500 grant, which we used to purchase a new laptop. This investment has significantly improved our operational efficiency. The laptop has allowed us to streamline processes, engage more effectively with customers online, and explore new tools to enhance productivity. It’s a resource we now rely on daily, and it has brought a noticeable boost to the way we manage our business.

Matthew’s expertise and the practical insights he shared were just as impactful as the financial support. He introduced us to strategies and technologies we hadn’t considered before, helping us to future-proof our business in an increasingly digital marketplace.”
